

ACCEPT SECURE, CONTACTLESS PAYMENTS VIA **EMV CHIP**, **APPLE PAY**® AND **GOOGLE PAY**™

ServiceTitan is now configured to work with the BBPOS Chipper™ 2X BT, a Bluetooth combined EMV, magstripe, and NFC card reader which pairs with both iOS and Android devices. With the BBPOS, technicians can swiftly take payments in the field and apply those payments to job invoices in ServiceTitan.

A FASTER, SAFER WAY TO PAY

EMV chips and digital wallets, such as Apple Pay and Google Pay, offer end-to-end data encryption, ensuring a swift, more secure transaction.

EASY BLUETOOTH PAIRING

Headphone jacks may be disappearing, but your team can stay ahead of the game. Connect the BBPOS Chipper to your tablet using Bluetooth.

SMALL BUT MIGHTY

Less than 3.5" in diameter, the ultra-compact, Bluetooth-capable BBPOS Chipper is easy to carry in a tech's pocket, adhere to the back of a tablet, or attach to a lanyard.

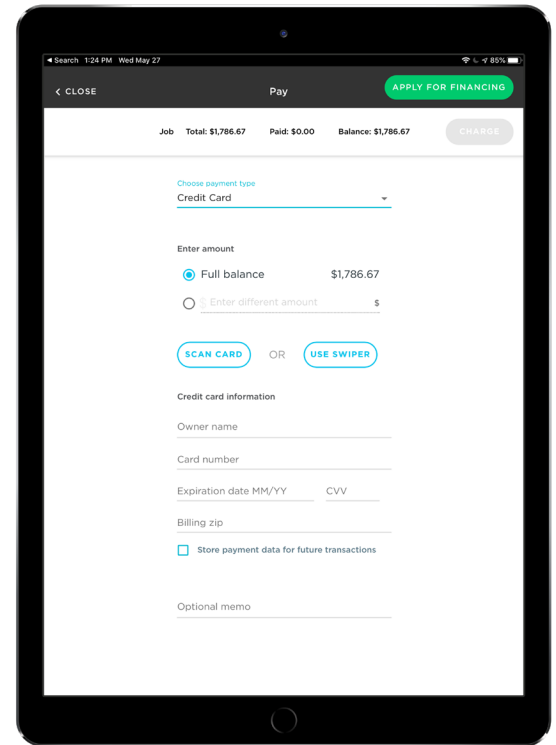

RESILIENT BATTERY LIFE

A light indicator quickly communicates battery status. Designed for high volume use, its extended battery life can last up to 800 EMV transactions before charging via micro USB.

SERVICETITAN PAYMENTS. FASTER PAYMENTS FROM ANYWHERE.

Get paid in the field, in the office, or online. ServiceTitan Payments offers flexible payments with mobile card and check capturing tools and an easy-to-use online payment portal. You'll save your team massive amounts of time by seamlessly connecting payment data to your shop's most time consuming accounting tasks, including automated matching and batching for reconciliation, flexible membership billing, automatically updating expired cards tied to recurring memberships, and integrated refunds. Plus, your back office will gain full visibility of all payment activity through our integrated reporting.

WHAT YOU NEED TO KNOW.

It will take 5-7 business days to process and receive your order. The BBPOS is currently available for U.S. customers only. This is the only EMV chip reader available for purchase which is configured to work with ServiceTitan Payments.
